

# 7-2-10

- A week of trial and error.
- Switched our methods multiple times to account for new goals/complications.
- Abandoned training on Caltech256 set.
- Returned to the Caltech101 set.

# 7-2-10

- Tested with 3, 6, and 15 training examples. (Patrick has the results)
- Sorry, no pretty pictures this time. Our graphs haven't been consistent. (lots of trial and error)
- Our results are above those of Fei Fei et al.

# 7-2-10

- Currently attempting “2-shot” on the Caltech101 set
- Trying to beat the K. Grauman and T. Darrell results.
- We will continue to tweak results in the background of our next assignment:

# 7-2-10

- We have switched to trying One-Shot recognition on categories of youtube<sup>®</sup> video clip Bag of Words histograms.
- Will be using Kevin Tang's methods to train on several categories and test on the others.
- 11 activity categories in total.
- May attempt One-Shot on different feature sets from the video clips.
